

COMPETENCY DEMONSTRATION

SITE SPECIFICATION DOCUMENT

Amel Hanifi – CIS 241

This is a site specification document. It will showcase the work I have completed throughout this quarter.

Competency Demonstration

Project Description

This is a site specification document for my personal Web site. My web site or Portfolio will enable me to showcase the work that I have completed throughout this quarter. We have been asked to build this web site through a process and consisted of number of smaller projects, which will replicate the Web development life cycle and reinforce the knowledge we acquired in our earlier studies.

My Page Design

As soon as you get into the home Page you will see my biography on the left, and a picture of me on the right. In the header, there will be a link to all the pages that I have created, for an easy access. The webpages I have created are as follow:

- **The home Page: [home.html](#)**

Where I introduced myself and shared some personal information about my previous jobs and my interests.

- **My personal resume: [resume.html](#)**

The resume is built in tables. I specified what kind of job I am seeking, my skills and my education. I also added a brief employment history.

- **Interest Page: [interest.html](#)**

This page will display some of my interests, through 4 external links. I will share some of my interest such as music, traveling, cooking and reading. As soon as the user click a link, he will be prompted to another page outside of my website.

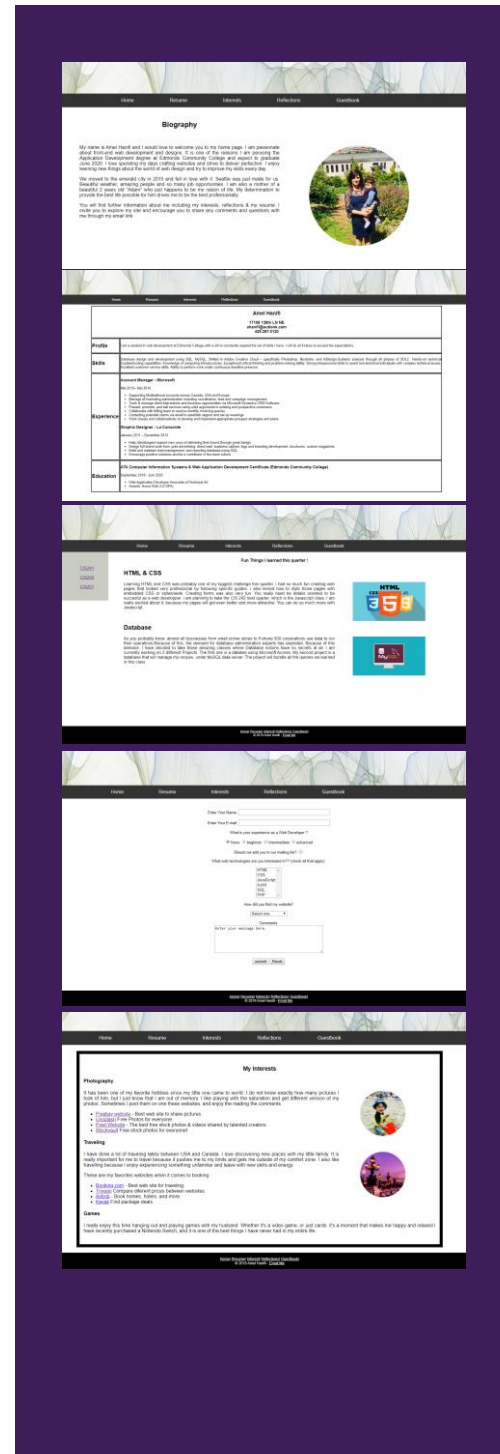

Screenshots Preview

- A "mailto" guestbook form: [guestbook.html](#)

This page is made specially for the visitors of my website. They will be asked to enter their names and email address, and will be asked couple questions related to their experience with web development and their interests. They will also provide some information about how they find my page, and can also leave a comment.

- "Ah ha!" moment Page: [reflections.html](#)

In this page I will share all the details I learned throughout this quarter. All the exciting moment when trying new statement. I will add some images of my favorites results.

Biography

My name is Amel Hanifi and I would love to welcome you to my home page. I am passionate about front-end web development and designs. It is one of the reasons I am perusing the Application Development degree at Edmonds Community College and expect to graduate June 2020. I love spending my days crafting websites and strive to deliver perfection. I enjoy learning new things about the world of web design and try to improve my skills every day.

We moved to the emerald city in 2015 and fell in love with it. Seattle was just made for us. Beautiful weather, amazing people and so many job opportunities. I am also a mother of a beautiful 2 years old "Adam" who just happens to be my raison of life. My determination to provide the best life possible for him drives me to be the best professionally.

You will find further information about me including my interests, reflections & my resumé. I invite you to explore my site and encourage you to share any comments and questions with me through my email link.

Profile

I am a student in web development at Edmonds College with a will to constantly expand the set of skills I have. I will do all it takes to exceed the expectations.

Skills

Database design and development using SQL, MySQL. Skilled in Adobe Creative Cloud – specifically Photoshop, Illustrator, and InDesign. Systems analysis through all phases of SDLC. Hands-on technical troubleshooting capabilities. Knowledge of computing infrastructures. Exceptional critical thinking and problem-solving ability. Strong interpersonal skills to assist non-technical individuals with complex technical issues. Excellent customer service skills. Ability to perform work under continuous deadline pressure.

Experience

Account Manager - Microsoft

Mai 2015– Mai 2016

- Supporting Multinational accounts across Canada, USA and Europe
- Manage all marketing administration including coordination, lead and campaign management.
- Track & manage client interactions and business opportunities via Microsoft Dynamics CRM Software.
- Present, promote, and sell services using solid arguments to existing and prospective customers.
- Collaborate with billing team to resolve monthly invoicing queries.
- Contacting potential clients via email to establish rapport and set up meetings.
- Work closely and collaboratively to develop and implement appropriate prospect strategies and plans.

Graphic Designer - La Concorde

January 2011 – December 2012

- Help clients/agent explore new ways of delivering their brand through great design.
- Design full brand suite from: print advertising, direct mail, business cabinet, logo and branding development, brochures, custom magazines
- Build and maintain lead management, and reporting database using SQL.
- Encourage positive solutions and be a contributor in the team culture.

Education

ATA Computer Information Systems & Web Application Development Certificate (Edmonds Community College)

September 2018 - Juin 2020

- Web Application Developer Associate of Technical Art
- Awards: Honor Roll (3.8 GPA).

My Interests – interest.html

My Interests

Photography

It has been one of my favorite hobbies since my little one came to world. I do not know exactly how many pictures I took of him, but I just know that I am out of memory. I like playing with the saturation and get different version of my photos. Sometimes I post them on one these websites, and enjoy the reading the comments.

- [Pixabay website](#) - Best web site to share pictures.
- [Unsplash](#) Free Photos for everyone.
- [Pixel Website](#) - The best free stock photos & videos shared by talented creators
- [Stockvault](#) Free stock photos for everyone!

Traveling

I have done a lot of traveling lately between USA and Canada. I love discovering new places with my little family. It is really important for me to travel because it pushes me to my limits and gets me outside of my comfort zone. I also like travelling because I enjoy experiencing something unfamiliar and leave with new skills and energy.

These are my favorites websites when it comes to booking :

- [Booking.com](#) - Best web site for traveling.
- [Trivago](#) Compare diferent prices between websites
- [Airbnb](#) - Book homes, hotels, and more.
- [Kayak](#) Find package deals

Games

I really enjoy this time hanging out and playing games with my husband. Whether it's a video game, or just cards, it's a moment that makes me happy and relaxed. I have recently purchased a Nintendo Switch, and it is one of the best things I have never had in my entire life.

Fun Things I learned this quarter !

HTML & CSS

Learning HTML and CSS was probably one of my biggest challenge this quarter. I had so much fun creating web pages that looked very professional by following specific guides. I also lerned how to style those pages with embedded CSS or stylesheets. Creating forms was also very fun. You really need be details oriented to be succesful as a web developper. I am planning to take the CIS 242 next quarter, which is the Javascript class. I am really excited about it, because my pages will get even better and more attractive. You can do so much more with Javascript.

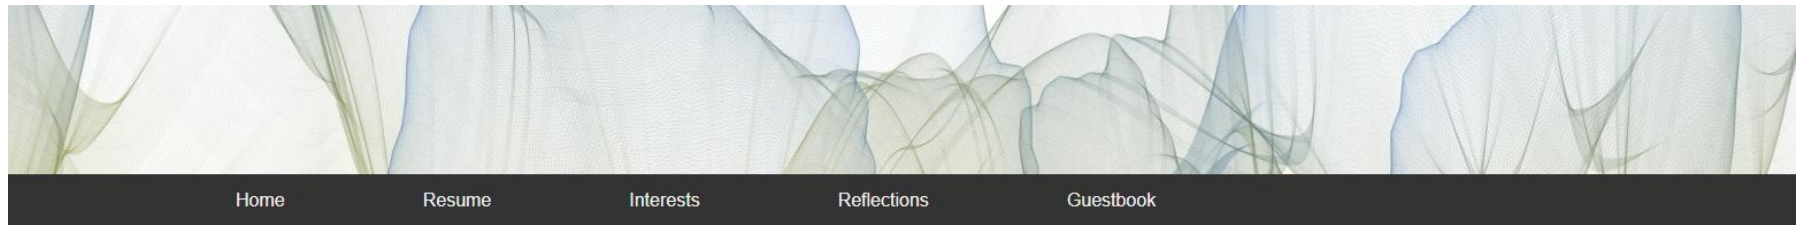

Database

As you probably know, almost all businesses from small online stores to Fortune 500 corporations use data to run their operations. Because of this, the demand for database administration experts has exploded. Because of this demand, I have decided to take these amazing classes where Database notions have no secrets at all. I am currently working on 2 different Projects. The first one is a databse using Microsoft Access. My second project is a database that will manage my recipes, under MySQL data server. The project will bundle all the queries we learned in this class.

Conclusion

I have developed this website only by using HTML and CSS. I am willing to take different other classes that has for goal to improve the layout and capabilities of websites in general, such as JavaScript and CMS. Other versions of this website will be available in the near future! stay tune!
